Warehouse & Office Relocations

APA Group recently appointed Goals A+N to relocate four existing office sites, within Brisbane, into a newly appointed centralised location. The works included the relocation of some 160 staff over a two staged relocation consisting of staff personal effects, files, desktop IT, library, centralised file collections, safes and the careful relocation of the comms server rooms.

Goals A+N's approach to the move was meticulous in the planning by their Project Management Team and the move was executed in a precise, well organised and professional manner from the careful packing of files and effects to the placement and connection of the IT component.

The APA Group have also recently engaged Goals A+N to assist in the relocation of two existing warehouses into a newly constructed building within the Brisbane city fringe. This major relocation consisted of the packing, relocation of stock, racking, warehouse machinery and equipment which required precise planning and timing to ensure the business maintained its operational duties throughout the two week relocation program. Heavy lifting equipment, the dismantling of shelving, transport of machinery and the countless number of trucks of materials and equipment were skilfully removed, placed and re assigned within the new premises.

We have found Goals A+N to be competent, capable and efficient with their approach, planning and professionalism in all types of relocations and would not hesitate to recommend their services to any prospective companies.

Please do not hesitate to contact me should you wish for me to confirm this reference verbally.

Kind Regards,

Klaudia Furness
Project Manager
